

# Vaishnavi Khot

Software Developer

vaishnavik172005@gmail.com | +91 78991 04751

## Profile

Software developer focused on building practical, user-friendly digital products and learning-driven engineering solutions.

## Summary

Passionate and curious developer with experience building full-stack web applications, database-backed systems, and smart-process solutions. Interested in software engineering, AI, and solving real-world problems with technology.

## Skills

- Java Full Stack
- HTML & CSS
- JavaScript
- ASP.NET Framework
- SQL
- MS SQL Server
- Visual Studio Code
- GitHub
- Swagger
- Postman
- React.js
- ASP.NET Core
- Entity Framework Core
- REST APIs

## Experience

- Software Development Intern | Toyota Kirloskar Motor (TKM)
- Developed a digital paint inspection workflow replacing paper-based check sheets.
- Built responsive frontend interfaces and integrated them with ASP.NET Core Web APIs.
- Designed SQL Server schemas for users, check sheets, inspection sections, and inspection results.
- Implemented authentication, role-based access, image uploads, inspection-point placement, and result-validation logic.

# Projects

- Vehicle Identification System — QR-based vehicle lookup and scan history using React, .NET 8, ASP.NET Core, EF Core, and SQL Server.
- Home Security System — IoT + AI smart security prototype with ESP32, facial recognition, Django API, and Flutter app.
- Paint Shop — Production dashboard concept focused on operational visibility, workflow flow, and quality insights.

# Focus

Focused on continuous learning, problem-solving, and creating meaningful technology that supports real-world workflows.
